

Dear Friend:

Once in a while there comes along a case that will shape and dictate America's future. I believe one such case is the class action lawsuit against The Mosque At Ground Zero. I believe that this "Victory Mosque" is the first volley in the war of Muslim Extreme Fundamentalism against America's public apathy. Please read below how one brave American and his lawyer are fighting back using one of America's greatest assets: our legal system, to work for the preservation of our American culture. We can reverse this tide of submission that those in the administration and on the left have chartered for our country. It starts, appropriately enough, at Ground Zero. Please do all you can to help. Also please note that, as a class action suit, they are also looking to enroll potential members of the aggrieved class, which can help someone, maybe you, who was affected by the 9/11 attacks.
